

Weather forecast of Islamabad for next 24 hours

Partly cloudy to cloudy sky conditions are expected with chances of widespread rain and thunderstorm at times during the period.

Expected Temperature Range (°C)

Maximum Temperature: 32-34

Minimum Temperature: 20-22

Present Synoptic Situation

Infra-red satellite image is showing almost clear sky conditions over Islamabad. One of the major reasons is absence of cyclonic winds at appropriate pressure levels. However, later on during the period cyclonic winds are likely to approach the city from south east direction that are part of a trough of a strong low pressure area located outside the country in west of Baluchistan at 850 hPa pressure level. These conditions are likely to intensify gradually and cause widespread rain and thunderstorm.

Forecast validity period

Issued at 04:00 p.m. on 12-07-2018

Valid till 04:00 p.m. on 13-07-2018
