Weather forecast of Islamabad for next 24 hours

Partly cloudy to cloudy sky conditions are expected with some chances of rain and thunderstorm occasionally during the period.

Expected Temperature Range (°C)

Maximum Temperature: 30-32
Minimum Temperature: 22-24

Present Synoptic Situation

Infra-red satellite image is showing some grey patches of low level clouds (base height less than 2000 meters) over Islamabad. One of the major reasons is presence of some cyclonic winds at 850hPa pressure level that are part of a trough of a low pressure area located in south-west of the city outside boundary of the country near Baluchistan. These conditions may produce more clouds associated with rain and thunderstorm during the period.

Forecast validity period

Issued at 04:00 p.m. on 09-08-2018
Valid till 04:00 p.m. on 10-08-2018
