

Weather forecast of Islamabad for next 24 hours

Cloudy weather with chances of scattered rain and thunderstorm is expected during the period.

Expected Temperature Range (°C)

Maximum Temperature: 14-16

Minimum Temperature: 5-7

Present Synoptic Situation

Infra-red satellite image is showing sky covered with a grey sheet of low level clouds (base height less than 2000 meters) over Islamabad. One of the reasons of formation of these clouds is presence of moisture carrying cyclonic winds at 700 hPa level over Islamabad that are coming from south west direction. The cyclonic winds are part of a trough of a low pressure area located in north-west of Pakistan away from boundary of the country. This situation is likely to continue during the period.

Forecast validity period

Issued at 11:30 a.m. on 13-12-2017

Valid till 11:30 a.m. on 14-12-2017
